Instructions for Use

ZEMBRACE™ SymTouch™ (Zem-brace Sim-Touch) (sumatriptan succinate) Injection

Read these Instructions for Use before you start to use ZEMBRACE™ SymTouch™. There may be new information. This information does not take the place of talking with your healthcare provider about your medical condition or treatment. You and your healthcare provider should talk about ZEMBRACE SymTouch when you start taking it and at regular checkups.

The ZEMBRACE SymTouch Autoinjector is a single-use, pre-filled injection device with the exact dose you need. The device should be used only 1 time and then discarded.

Caution: Do not inject where your skin is scarred, bruised, tender, red or near any open wound. Do not touch injection site area after cleaning. Do not put or press thumb, fingers or hand over the Yellow Needle Guard.

ZEMBRACE SymTouch when you start taking it and your healthcare provider should talk about when to take ZEMBRACE SymTouch at regular checkups.

Important Precautions

Keep out of reach of children. Do not use after the expiration date has passed. Do not store or expose to high temperatures. Do not freeze. Do not remove the Red Cap until you are ready to inject. Do not use if dropped after removing the Red Cap. Do not put or press thumb, fingers or hand over the Yellow Needle Guard.

Step 1 - Inspect Autoinjector and Gather Supplies

1A - Remove Autoinjector from the carton

Inspect the appearance of ZEMBRACE SymTouch Autoinjector medicine through the medicine window. It must be a clear, colorless to pale yellow solution. Do not inject the medicine if the solution looks discolored or cloudy or contains lumps, flakes, or particles.

1B - Check the Expiration Date on the Autoinjector

Wait 5 seconds before you remove the Red Cap.

Do not use if the expiration date has passed.

1C - Inspect the medicine through the Medicine Viewing Window

If the expiry date has passed, do not use the Autoinjector.

1D - Gather the following supplies

1. Autoinjector
2. Alcohol Swab
3. Sterile Cotton Ball or Gauze
4. Puncture-Resistant Sharps Container

Step 2 - Choose and Prepare Your Injection Site

2A - Choose your injection site

The recommended injection sites are the sides of the thighs and the arms.

Caution: Do not inject where your skin is scarred, bruised, tender, red or near any open wound. Do not put or press thumb, fingers or hand over the Yellow Needle Guard.

Do not touch injection site area after cleaning.

2B - Clean the injection site with an alcohol swab

Remove the Autoinjector by lifting it straight away from your skin. The Yellow Needle Guard will drop down and lock over the needle.

3A - Place Autoinjector straight on your injection site

Place the Autoinjector straight on your injection site (90 degrees) with the Yellow Needle Guard end gently pressed against injection site (90 degrees) with the Yellow Needle Guard. The device should be used only 1 time and then discarded.

3B - Perform Injection

Press and hold the Autoinjector down against your skin. You will hear the first “Click 1” as the injection starts. Continue to hold the device down until you hear the second “Click 2”.

After “Click 2,” continue to hold down and slowly count to 5 to make sure you receive your full dose.

CONTINUE TO HOLD DOWN AND SLOWLY COUNT TO 5.

1...2...3...4...5

3C - Remove Autoinjector from skin

Remove the Autoinjector by lifting it straight away from your skin. The Yellow Needle Guard will drop down and lock over the needle.

Important: To receive your full dose, always hold the Autoinjector down on your injection site for additional time after you hear the second click. This allows all of the medicine to be delivered.

Caution: Call your healthcare provider if the Red Plunger Rod has not filled the Medicine Viewing Window. This may mean that only a partial dose was delivered. Do not try to reuse the Autoinjector.

4A - Confirm Red Color in Medicine Viewing Window

Look to confirm that the Red Plunger Rod has filled the Medicine Viewing Window. This means you received the full dose.

4B - Dispose of the Autoinjector

Put your used Autoinjector, caps, needles, and sharps in an FDA-cleared sharps disposal container right away after use. Do not throw away (dispose of) loose needles and syringes in your household trash. Do not recycle your used sharps disposal container.

Caution: If you do not have a FDA-cleared sharps disposal container, you may use a household container that is: crushable, leak-proof, rigid, made of sturdy plastic, and has a puncture-resistant lid, without sharps getting through the lid, and lock over the needle.

When your disposal container is about full, you will need to follow your community guidelines for the safe disposal of your disposal containers. There may be state or local laws about how you should throw away used needles and syringes. Check with your local waste disposal service or your community guidelines to get the information you need. For specific information about disposal in the state that you live in, go to the FDA's website at: http://www.fda.gov/safesharpsdisposal. Do not dispose of your used sharps disposal container in your household trash unless your community guidelines permit this. Do not recycle your used sharps disposal container.

If needed, make sure you get a refill of your Autoinjector.

4C - Treat Injection Site

Treat the injection site with a cotton ball, gauze pad or bandage, as needed.

Do not rub the injection site.
